DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 29 are drawn to a lacrosse stick, classified in class 473, subclass 513.
- II Claims 30-37 are drawn to an articulation means, classified in class 473, subclass 505.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a lacrosse stick could be fabricated from a semi-flexible shaft. The subcombination has separate utility such as means for attaching a garden utensil to a handle.

If the applicant elects Group I, the following species restriction is also made:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group III- Lacrosse sticks as shown in Fig 1-9B.

Group IV- Lacrosse sticks as shown in Fig 20.

Group V- Lacrosse sticks as shown in Fig 21.

Group VI- Lacrosse sticks as shown in Fig 24 AB.

Group VII- Lacrosse sticks as shown in Fig 25.

If the applicant elects Group II, the following species restriction is also made:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group VII - Articulation means as shown in Fig 16.

Group VIII - Articulation means as shown in Fig 17.

Group IX - Articulation means as shown in Fig 18.

Group X - Articulation means as shown in Fig 19.

Group XI - Articulation means as shown in Fig 26.

Group XII - Articulation means as shown in Fig 28.

Group XIII - Articulation means as shown in Fig 29.

Group X - Articulation means as shown in Fig 10.

Group XI - Articulation means as shown in Fig 11.

Group XII - Articulation means as shown in Fig 12-15.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to applicant's attorney L. Northrop on July 28, 2005 to request an election to the above restriction requirement with a voice mail

message to respond if applicant wished to discuss the restriction. Since their has been no response this action being mailed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
